

Finance Transformation Series

Various dates throughout 2020

Program Description

Spreadsheets are more than forty years old now, yet accountants continue to use this antiquated technology as the backbone for their close processes. While you may be comfortable with SALY (same as last year) mentality, this thinking brings wasted time, increased risk and cost, and low morale to your team. The bottom line – Traditional manual accounting processes are not sustainable.

Your business is dynamic and modern business requires a modern approach to accounting. This new way of thinking is achievable – you can get there faster than you think, and it is gaining traction with your peers.

We hope to join you as you take these next steps in your journey to Modern Accounting!

Join the Finance Transformation Series to learn:

- The new – Unified, Automated and Continuous accounting methodology.
- Tips to change your current close process
